### Migration facts and information - Culture

However, a recent study has shown that although the 'wet' phase holds up for Sapiens' early migration into the Levant and Arabia between roughly 120,000-90,000 years ago, during the time of the main migration (around 55,000 years ago) the Horn of Africa was actually really dry, arid, and a bit colder. This may, then, have helped push the main wave out.

### Early Human Migration - Ancient History Encyclopedia

Early human migrations are the earliest migrations and expansions of archaic and modern humans across continents and are believed to have begun approximately 2 million years ago with the early expansions of hominins out of Africa of Homo erectus.This initial migration was followed by other archaic humans including H. heidelbergensis, which lived around 500,000 years ago and was the likely ...

### Early human migrations - Wikipedia

Modern humans first arrived in Great Britain during the Palaeolithic era, but until the invasion of the Romans (1st century BC) there was no historical record. With the Fall of the Western Roman Empire , large numbers of Germanic speakers from the continent migrated to the southern parts of the island, becoming known as the Anglo-Saxons and eventually forming England .
