If you want to understand your Lincoln SA-200 welding machine, you need a basic understanding of the DC generator. Your SA-200 is really two DC generators that work in tandem. The first generator is the exciter (the nose that sticks out the front of the machine). This exciter is actually a 2 kW (kilowatt) DC generator which provides a DC ...

Repair technicians will be shown the fundamentals of conventional welder operation. The class will begin with basic theory and then show how that theory applies to machines normally serviced by LASFs. The machines in this course will include transformer/rectifier and basic inverter style machines, as well as engine driven machines and wire feeders.
