Shipping Solutions | UPS - United States

Report summary. Demand for LNG shipping has turned a corner in 2017. New LNG supply and increased Atlantic to Pacific basin long-haul flows have created more employment for ships. After five years of low or falling vessel demand growth, 2017 should see a double digit percentage increase in demand. Unfortunately for ship owners, but not ship charterers, the supply of LNG ships is keeping pace as ships ordered in the 2011 to 2015 ordering boom are delivered to the fleet.

FLEX LNG

Political instability has also encouraged countries to develop an energy policy that makes them more independent from pipeline supplies. In this scenario, the shipping of natural gas by LNG carrier is an obvious solution. Modern LNG tankers require highly reliable propulsion systems with excellent service support as engine availability is critical.

LNG - MAN Energy Solutions

LNG shipping was a fairly uneventful and steady business during the 2015-2017 period and spot charter rates remained low as the market struggled to absorb excess shipping capacity. But in the second half of 2018, the LNG tanker market tightened, and daily shipping rates shot up to almost
