Rethinking Symbolism - Dan Sperber

This is admittedly not terribly important now, but in developing his argument Sperber analyzes the use of symbolism in culture (both among the Dorze people of Ethiopia and in contemporary western culture) and provides some interesting takes on symbols and their uses. One of his points is that symbols in themselves are meaningless but are

Cognitive science is the interdisciplinary, scientific study of the mind and its processes. It examines the nature, the tasks, and the functions of cognition (in a broad sense). Cognitive scientists study intelligence and behavior, with a focus on how nervous systems represent, process, and transform information. Mental faculties of concern to cognitive scientists include language, perception ...
