By developing supplier, distributor and customer networks for various industries and market segments, global reach is achieved. Imo Pump manufactures rotary positive displacement three-screw and gear pumps.

Imo Pump | CIRCOR

All systems with screw pumps should be equipped with a pressure relief valve installed immediately adjacent to the pump. In the standard versions of IMO AB low pressure pumps, this pressure relief valve is an integral part of the pump to protect the pump against excess pressure.

Screw pumps - IMO

Three screw pumps tend to be high speed pumps, not unlike centrifugal pumps. Two pole and four pole motors are the most common used. When large flows, very high viscosities or low available in- let pressures dictate, slower speed may be necessary. For example, some polymer ser- vices handle liquid at 50,000 centistokes or more.

High Performance Rotary Screw Pumps

Allweiler ® and IMO ®. The world's most trusted three-screw pumps. Built with quality parts and unmatched expertise, our pumps deliver a level of reliability that's made them an industry standard.

Three-Screw Pump | Machinery Lubrication | CIRCOR

World leader in Positive Displacement PD pumps for lube and fuel handling systems including booster and sealless magnetic coupled pumps.

IMO - Marine pumps, Optiline pumps, Magnetic couple pumps ...

Seal chamber priming for 3E model pumps with mechanical seals: For the Imo 3E Model pumps with mechanical seals, there is no seal vent port. The mechanical seal in these model pumps is located in the discharge chamber of the pump and is in the fluid flow path. In these model pumps the complete pump must be filled and vented of any trapped

GENERAL INSTALLATION, OPERATION, MAINTENANCE ... - Imo Pump

Read Book Screw Pumps Imo

Archimedean Screw Pumps are ideal for moving large volumes of liquid with low lift. Consisting of few moving parts, Screw Pumps provide a built-in variable capacity while operating at a constant speed, resulting in minimum wear and maintenance. Lakeside Equipment has been designing Screw Pumps since 1969.

Screw Pumps Archives | Lakeside Equipment Corporation

The ALLWEILER® and IMO® three-screw pumps are rotary, self-priming positive displacement pumps. The pumping elements consist of three moving parts: the power rotor (main screw) and two symmetrically opposed idler rotors, all operating within close fitting housing bores.
