### **Day Trading Strategies: 4 Timeless Approach That Work**

Day trading is a speculative trading style that involves the opening and closing of a position within the same day. Quick example: If you open a new position at 10AM and close it by 2PM on the same day, you have completed a day trade. If you were to close that same position the following morning, it would no longer be considered a day trade.

## **Simple Trading Strategies - The Inside Day Strategy**

This day trading strategy generates a BUY signal when the fast moving average (or MA) crosses up over the slower moving average. And a SELL signal is generated when the fast moving average crosses below the slow MA. So you open a position when the MA lines cross in a one direction and you close the position when they cross back the opposite way.

## Strategy

A simple swing trading strategy is a market strategy where trades are held more than a single day. They are usually held between 3 days and 3 weeks. Here is how to identify the right swing to boost your profit. Our team at Trading Strategy Guides has already written about other swing trading strategies that work.

### **Swing Trading Strategies that Work**

A trading session often begins with a strong move, called an impulse wave, in one direction. This usually occurs within the first five to 15 minutes after stock trading begins. The price may then pull back and stall out, forming a consolidation where the price moves sideways for two or more minutes.
