The numbers Eyring cites have flipped just in the 40+ years in which he wrote his book: now some 93% of members of the National Academy of Sciences are atheists. Another point is that a skilled scientist can believe all sorts of strange and unsupported things outside the realm of his or her specialty.

The Faith of a Scientist by Henry Eyring - Goodreads

The Faith of Scientists is an anthology of writings by twenty-one legendary scientists, from the dawn of the Scientific Revolution to the frontiers of science today, about their faith, their views about God, and the place religion holds--or doesn't--in their lives in light of their commitment to science. This is the first book to bring together so many world-renowned figures of Western science and present them in their own words, offering an intimate window into their private and public ...

Online Library The Faith Of A Scientist

Science has not found evidence precluding the belief in God, miracles, or the resurrection of Jesus. Such fields are outside the competency of science and its methodology. Faith is not incompatible with the evidence. Everyone has to believe in a hypothesis concerning where the compelling evidence leads them.
